## **Silo- descent equipment: liftheight 25m/60m**

The silo- descent equipment **type 6-1550** for maintenance and cleaning as well as repairworks in silos, shelters and pits can descent down to a depth of 60m meters. For transportation it is possible to fold together so it will fit in an elevator for example.

The equipment systems is available in different models, such as use by hand, electro-or compressed air-drive.

Powered by a two rope - drive pulley  
WTW 375/500..

## technical data:

(example electrical powerd 60 m)

external dimensions in work position:

B = 40 –1.040 mm

L = 2.150 mm

H = 2.223 mm

external dimensions folded up:

B = 740 mm

L = 1.350 mm

H = 1.480 mm

liftingspeed: 0,2 m/sec.

drive power: 280 V, 50 Hz, 0,75Kw

pay load: 1.500 N (150 kg)
